

The New Jersey Section of the  
American Water Resources Association  
invites you to:

## The 14th Annual Water New Year's Eve & 48th Anniversary Celebration

The Water Year is used by hydrologists to show the monthly patterns of precipitation, evaporation/evapotranspiration, runoff, and groundwater recharge, the primary components of the hydrologic cycle. Hydrologists use a year that begins on October 1st when soil moisture begins to be recharged following the summer months. NJ-AWRA uses the Water New Year as an occasion to celebrate water resources and have some fun with our members!
