

**The New Jersey Section of the  
American Water Resources Association  
Invites you to:**

**The 19<sup>th</sup> Annual Water New Year's Eve Celebration**

The Water Year is used by hydrologists to show the monthly patterns of precipitation, evaporation/evapotranspiration, runoff, and groundwater recharge, the primary components of the hydrologic cycle. Hydrologists use a year that begins on October 1<sup>st</sup> when soil moisture begins to be recharged following the summer months. NJ-AWRA uses the Water New Year as an occasion to celebrate water resources and have some fun with our members.

**September 27, 2023, 5:30pm – 8:30pm**
